- Australian localised Windows 7 driver CD-ROM.
- For a limited time includes BONUS 3 month FREE IceTV membership valued at \$33. (For more information visit: www.icetv.com.au)

Features

- Two high quality digital/analogue TV tuners on board. Watch one TV channel of either digital or analogue input while recording another!
- Watch, pause and record analogue and digital TV in Windows 7 Media Center. Record high definition digital TV to your PC's disk in the highest video quality!
- Dual high quality hardware MPEG-2 encoders for recording analogue set-top box TV. Record to disk using from 1-2 Gigabytes of disk space per hour.
- While recording, the HVR-2210's hardware MPEG-2 encoders do all the work, so your PC continues to run at full speed.
- Use Windows Media Center's FREE TV scheduler to automatically record your favourite TV shows.
- HVR-2210 Media Centre Kit includes a full-size Windows Media Center remote control transmitter and receiver. Manage all Media Center functions with the included remote control. The included USB IR transmitter allows automatic control of recording from most set-top boxes.

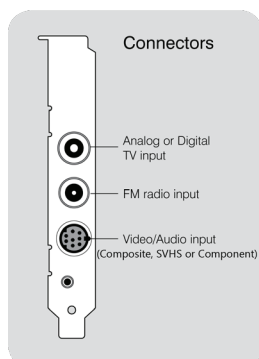

System Requirements

- Minimum processor recommended: 2.2 GHz Intel® P4, Core Duo, Dual Core or equivalent
- Microsoft® Windows 7®
- Available PCI Express x1 or x16 slot

The HVR-2210 Windows Media Center Kit is the best way to add TV to your Windows 7 PC.

Plug the HVR-2210 into a PCI Express slot in your PC, plug in the included USB Media Center remote control receiver, connect your antenna. Watch analogue TV, high quality digital TV or a set-top box input (via Component*/SVHS/Composite). You'll be watching TV with Media Center's TV button in no time!

Get the best from Windows 7 Media Center:

Windows 7 Media Center and HVR-2210 allow you to watch one digital TV (or analogue source) channel while recording another of any type!

Use Windows Media Center's TV scheduler to automatically record your favourite TV shows.

Record from your set-top box to disk without slowing down your PC with dual high quality MPEG-2 encoders.

Pause analogue and digital TV, with instant replay, skip, fast forward and rewind.

Use the included remote control to control all Windows Media Center functions, such as digital picture slide shows, DVD play, music playlists, and more....

Highest Quality analogue input. HVR-2210 has broadcast industry standard component* input for the highest possible quality capture from your set-top box.

Dual tuners for any TV format. HVR-2210 has two tuners for all TV formats. Use the Windows Media Center scheduler and you'll never miss your favourite TV shows again!

High definition digital TV brings you sharper TV with great sound. Watch high definition digital TV at up to 1080i on your PC screen. HVR-2210's high quality digital TV receiver will record high definition digital TV programmes to your PC's hard disk in the original high definition without losing quality.

Full size Microsoft certified Windows 7 Media Center remote control included. Control all Media Center's functions with the included remote control. Play music, start a slide show, all from the comfort of your living room couch.

Cable TV or set-top box recording. The included Media Center USB IR transmitter can control the channel changing of your set-top box. Automatically schedule and record TV from cable TV or set-top box receiver.
