THE SMALLEST & LIGHTEST FULLY CONTROLLABLE MINI HELICOPTER WITH GYRO

MICRO HORNET

This Swann Micro Hornet mini RC helicopter is probably the world's smallest and lightest! The tiny 5.5" (14.5cm) long helicopter is fully functional and equipped with the latest Gyroscope technology. It can take off from the palm of your hand! With a bit of practice, the easy to use remote controller with trimmer and full directional joystick, will have you hovering the fast and agile hornet with precision and style!

Powered by a built-in rechargeable Lithium battery, simply plug the lead into the infrared controller to re-fuel. 20-30 minutes of charge time will give you up to 5 minutes of flight time. Whether you are young or just young at heart, this tiny RC helicopter packs endless hours of fun for everyone!

FEATURES

Made for Indoors

The smallest and lightest RC helicopter, is made of specialized, lightweight construction built specifically for indoor use. It comes with a spare set of main rotor blades and rear rotor.

No setup, simply charge and take off

Comes fully constructed and ready to fly. Simply charge the battery and you're away with up to 5 minutes flying time per charge! Charges off the remote control within 20-30 minutes.

Easy to control with realistic movement

The advanced 3.5-channel, infrared remote control operates forward/backward, left/right and up/down giving you full control and a realistic real life helicopter motion.

Small, agile and lots of fun

Super easy to fly and will have you performing death-defying turns, dives and stunts in no time! The fine tuning rotation trimmer enables you to perfect your flight.
