

Liebert® PSI

High Performance Power Protection for Servers and Networking Equipment

750VA ■ 1kVA ■ 1.5kVA ■ 2.2kVA ■ 3kVA

Liebert PSI is a feature-rich UPS system with industry leading 0.9 power factor. Its high power output delivers superior performance on power factor corrected (PFC) power supply and satisfactory backup time in the high demand environment. Liebert Multilink UPS software protects servers through local USB communication or via network. Matching external battery cabinets offer UPS backup time to several hours in the extended requirements (for Liebert PSI-XR models only).

Features

Lowest Total Cost of Ownership

- Operates at a high 0.9 power factor that makes it ideal for today's modern IT equipment, providing 29% more power than typical UPS
- Reduced installation time and costs - shipped with batteries connected and charged
- Two-year warranty - no-hassle replacement
- Supports Liebert Multilink shutdown software

Higher Availability

- Greater than three to five minutes of internal battery backup time at 100% load provides ample time for an orderly shutdown of equipment.
- Buck / boost automatic voltage regulation technology protects against utility voltage fluctuation by raising and lowering utility power to the level needed by connected equipment

Flexibility

- Eight to nine battery-backed outlets for Liebert PSI models, six to seven battery-backed outlets for Liebert PSI-XR models
- User-replaceable and hot-swappable batteries
- Rack / Tower Convertible with rotatable display panel, 2U in height on all models
- Multiple remote communications and shutdown options provide remote monitoring and power management - EB / SNMP, USB, contact closure and remote power off

The Liebert PSI is Ideally Suited for

- Network Computers
- Servers
- Network Closets
- Computer Rooms
- Large Network Peripherals
- Network Storage Devices

Bringing our Enterprise Level IT Expertise to your SMB

Emerson Network Power offers a full range of power protection solutions suitable for every requirement or scenario. From desktop computing, network equipment, computer rooms to large scale data centers, we make sure you get the same level of protection the Fortune 500 companies enjoy with Emerson. It is our way of Bringing Enterprise Level IT expertise to your SMB.

Desktop Computing

- Liebert PSP
- Liebert PSA

Network / Computer Room

- Liebert PSI
- Liebert GXT
- Liebert ITA

Data Center

- Liebert APM
- Liebert NX
- Liebert Hipulse

Reliable UPS Protection and Extended Battery Time Keep Your Network Up and Running

The flexible design of Liebert PSI allows the unit to be configured as a self-standing tower or to be rack-mounted within a 2U space. It is available in four capacities, in both 120V or 230V models.

The UPS features an innovative design incorporating buck / boost automatic voltage regulation technology. This protects against utility voltage fluctuation by raising and lowering utility power to the level needed by the connected equipment. It also allows the UPS to prolong battery life by maximizing its time on utility power before going to battery.

Rotatable Display Panel

The LED display panel rotates 90° to make the readout of the LED display easy to see in rack or tower position.

Optional Liebert MicroPOD Output Distribution And Maintenance Bypass Module

When your computer system can't be without power, even for scheduled UPS maintenance, the Liebert MicroPOD Maintenance Bypass and Output Distribution Unit ensures continuous uptime. It allows you to manually transfer connected equipment to utility power via a maintenance bypass switch, permitting scheduled service or UPS replacement without the need to shut down connected equipment.

Features:

- 2U height minimizes rack space requirements
- Installs with plug-and-play ease
- Two-year, no-hassle replacement warranty

Automatic Frequency Sensing

The UPS automatically adjusts to the input frequency, 50Hz or 60Hz.

Optional Liebert IntelliSlot Web Card

Provides SNMP and web-based management

Liebert Multilink software provides you:

- Warnings to computer users of power loss, and graceful operating system shutdown when needed
- Full functionality and automatic shutdown protection right out of box - virtually no configuration is required
- Intergration with Liebert Web card and network shutdown capability
