## Personal Key Highlights

Personalize your home screen to reflect your favourite webs and applications with TouchFLO Zero.

Changeable covers let you change the colour of your Click to match whatever you might need it to match.

Get the latest applications such as news, weather, converters, travel guides downloaded straight to your Hero from Android Marketplace

Search just about anything on your Click. The dedicated Search button combs through tweets in Twitter, locates people in your contact list, finds emails in your inbox, searches through appointments in the calendar as well.
