LIGHT & FAST HELICOPTER WITH PRECISION CONTROLS

MICRO LIGHTNING

The sky is your playground with the super-fast and agile Swann Micro Lightning helicopter. A high tech co-axial gyroscope system makes the Swann Micro Lightning easy to control and easy to enjoy. It's also fully constructed and ready to fly – there is no setup or counterweighting required! The video game styled controller features two analog control sticks and a trim controller – all of which can be operated with little or no practice. This aerial assassin operates like a bolt from the blue and can be taken anywhere that fun is allowed! The Swann Micro Lightning is easy to re-charge on-the-go using the attachment on the remote control or via your computer's USB port.

REMOTE CONTROL

FEATURES

Easy to setup

Fully constructed and ready to fly. Just charge the battery and you're away with up to 8 minutes flying time per charge!

Complete control

The advanced 3-channel, infrared control operates Forward/Backward, Left/Right, Up/Down movements with ease.

Simple operation, realistic performance

The Swann Micro Lightning helicopter is super easy to fly and the death-defying turns, dives and stunts will blow you away!

Built for indoors

The specialized, lightweight construction of the Swann Micro Lightning chopper will withstand impacts and crashes.

Charges off the remote control or USB port

The helicopter can be fully re-charged in less than an hour directly from the remote control or from your computer's USB port (20-30mins via USB).

SPECIFICATION
