3G Wireless N150 Mini Router—m1 *NetComm*®

Simple, portable, ultra compact. Share your wireless broadband connection with up to 10 devices.

NetComm's 3G Mini Router m1 is a compact and economical solution to connect multiple wireless-enabled devices to a single mobile broadband account. The m1 creates a personal Internet zone at your home or office.

Simply plug in a compatible 3G/Next G™ modem and the m1 will allow you to share the Internet connection with laptops, Macs, iPads and other wireless-enabled devices.

The built-in Wireless N access point provides W-LAN data speeds up to 150 Mbps and is also compatible with devices that support Wireless G¹.

¹ Maximum wireless signal rate and coverage values are derived from IEEE Standard 802.11g and 802.11n specifications. Actual wireless speed and coverage are dependent on network and environmental conditions included but not limited to volume of network traffic, building materials and construction/layout.
